William Melander

Gameplay / Player Programmer

ABOUT

I am a passionate and detail oriented Gameplay programmer. Always striving to improve my skills to make a game's vision come to fruition.

Utilizing my game design knowledge when programming to create systems and gameplay that deliver a high quality and worthwhile experience to players.

FUN FACT: I grew up in Sweden, Japan, Costa Rica, the UAE and the US.

Swedish English

EDUCATION

August 2024 - Present

The Game Assembly - Stockholm

Higher Vocational Education Diploma in Game Programming

Generalist game programming with personal and group projects consisting of 14+ people using Unity and a custom C++ game engine. Responsible for Player Programming as well as assisting in other Gameplay Systems. Courses in Linear Algebra, Network Programming, Tool Development, Data Structures, and more!

October 2020 - June 2023

Uppsala University - Campus Gotland

Bachelors Degree in Game Design

Studied Game Design with a focus in Game Programming and wrote my thesis on OldSchool RuneScape's polling system and how it made players feel like they had control over what changes the developers should and shouldn't make.

EXPERIENCE

July 2025 - February 2026

Connect 5G, Inc.

Part time UX Developer

Worked to improve front end features and UX for the internal version of the platform Magma. As part of the job I have become familiar with virtual machines, Ubuntu, React, and Typescript.

Developed new service to handle Access Gateway remote commands.

September 2023 - July 2024

O'Learys Ekerö

Server / Barkeep

Worked full time as a server/barman and had responsibilities such as restocking the bar, pouring and making drinks, taking customer orders, as well as opening and closing the restaurant.
